PROJECTS

INSTAGRAM
It's full stack application with full of technologies. The Frontend is designed in Tailwind with custom Css and HTML. On the other hand Backend technologies are Node.Js, Express.Js and MongoDB

PINTEREST
It's also a full stack application built on EJS Template Engine. The main role of this application was to target the backend. As the frontend is designed with tailwind and bootstrap components.

OCHI DESIGNS
It's a masterclass frontend design with smooth scrolling and full of animations. The eyes animation take this project to next level. This is a complete React.Js project. The target in this was just frontend.
